ProBoom™ Deluxe Mic Arm with 30 cm Riser

Undoubtedly, the world's most popular Mic™ arm in the radio broadcast industry.

Our famous Deluxe Ultraflex® arms provide unequalled holding power and "squeak-free" operation while "on the air".

Provided with a 5/8-27 threaded mounting stud to hold virtually any microphone in a stable position.

Overall reach of this model is 73 cm, and comes with our standard 30 cm vertical riser to clear nearfield monitors. Smooth, quiet operation leaves our competition in the dust!

PROBOOM™ ELITE Mic Arm with 30 cm Riser

The new standard in microphone arms... our ProBoom™ Elite series. Featuring an exclusive wire channel top arm for fast installation of XLR cable, there is no easier mic arm to install. With our patented arm and cover, you can have this arm wired in less than 10 seconds!

Our standard configuration is our 73cm reach model, with special 38 cm vertical riser. Our 38 cm riser also has an integrated XLR cradle for clean and easy installation, as well as offers the choice of side exit or through desk cable installation. Complete with 5/8-27 threaded mounting stud. No other manufacturer gives as many options!

PROBOOM™ Special Edition

ProBoom™ Elite Mic Arm - This is our Extended reach Mic™ Arm model, with two long armatures, and adjustable spring tension points. This arm was originally designed exclusively for RCA. It features a 114 cm total reach, and has the capability to adjust the spring mounting points. This allows for increased spring tension, to hold up heavier microphones, without the need to purchase new armatures or springs. This arm is offered in a choice of finishes. 5/8-27 threaded mounting stud included.
